

### Female Hormone Panel

#### Tests included in the Female panel:

<b>Estradiol</b>	<b>Progesterone</b>
<b>Follicle Stimulating Hormone</b>	<b>Testosterone</b>
<b>Prolactin</b>	<b>DHEA-S</b>
<b>Luteinizing Hormone</b>	<b>Sex Hormone Binding Globulin</b>

The most efficient way to do things is to schedule a lab draw for the Female Hormone Panel and then schedule a consultation with Dr. Morris MD once the lab results come back. Lab results come back between 10-14 business days. This initial consult includes history and physical exam, review of any labs/imaging, notes, orders, prescriptions. Expect the initial consult to be around 45 minutes.

**New Patient Consult with Dr. Morris \$300.00**

**Female Panel: \$180.00**

**Established Patient visit with Dr. Morris is \$250.00**

Visits with Dr. Morris are not covered by insurance. We do not bill insurance for lab work. Our fees are typical of a level four visit which is a complicated medical visit including up to three chronic medical issues.
